2026.1 Release

Intercompany Eliminations

Account Setup and Maintenance: Enhancements to the Intercompany Elimination Feature

View Source Transactions for All Balance Sheet Elimination

- Intercompany Eliminations, you can now view source transactions on elimination journal entries for all account types, including Accounts Payable, Accounts Receivable, and Other Assets and Liability.

New Intercompany Elimination Dataset in SuiteAnalytics Workbook

- Analytics > Intercompany Elimination Dataset is now available. This provides detailed visibility into all intercompany elimination journal entries.

Inventory Management

Inventory & Quality Management Enhancements

New Consigned Inventory Management

- Adds Consigned Inventory Management feature that tracks vendor-owned stock separately with special statuses

QMS

- Advanced Automated Sample Evaluation and Summary in Sampling Process
- Auto-calculate Sampling Summary Fields
- Evaluate Sample Data Button
- Configurable Defect Counting Methods (Statistical Sampling)

2026.1 Release

Reporting

> Primary Record Filtering for Address Subrecords

- Address-related subrecords (address and addressbook) are now filtered automatically for only those addresses linked to the specific primary record you're viewing. I.e Customer, Vendor, or Employees.
- NetSuite now only shows the addresses associated with the main record. This can impact historical Saved Searches due to the change in query logic

> Login Notification

- Allow clients the ability to more easily comply with NIST standards -- Users with the Administrator role can set up a login notification in their account. Users must acknowledge the message before accessing the account as well as tracks when the acknowledgment is acknowledged as well as date/time.

Inventory Management: SCM Mobile Enhancements

SCM Mobile

- Default Sorting for Tables
- New Toggle Switch Page Element
- iOS Support
- Mandatory Condition for Page Elements
- New Options for Image or File Compression
- Adding Custom Columns to the Right Side of Transfer Tables
- Print to File Option Within the NetSuite UI
- Updates to the Close Icon on Popup Windows
- Dynamic Button Visibility on Independent Pages
- Customizing the Label Field Using Expressions

Order Management: NetSuite Ship Central Enhancements

Ship Central

- Scanning of HIBC Bar Codes During Packing
- Autogenerated UCC-Based IDs per Subsidiary
- Preference for Scanning of GS1 Application Identifier 02
- Pack Carton or Package Threshold for Packing and Shipping
- Shipping to Drop-off Points
- List Rate and Negotiated Rates for UPS and USPS (Stamps.com)
- Increased Threshold Options for Bulk Shipping
- Updates to Other Party Billing
- Option to Disable NetSuite ShipEngine Accounts

2026.1 New Release

SuiteAnalytics

- Upgrade to JDBC Driver Version 8.10.184.0 Recommended
- New Toggle Switch Page Element
- New Option to Publish Saved Searches on a Website
- Outdated NetSuite.com Data Source is No Longer Available

2026.1 Release

SuiteBilling

- › CSV Import
 - SaaS Fields Available for Items Import
- › Order Management: SuiteBilling
 - Commitment Credits in SuiteBilling
 - Prepay Across Subscriptions
 - Customer Level and Cohort Analysis: Enhanced SaaS Metric Recurring Revenue Reporting

Authentication

Suitetalk

- Limited Number of Certificates per Integration Record
- Support for Multiple Redirect URIs
- Multiple Sessions per User Requires 2FA
- Manage OAuth 2.0 Client Credentials Certificates Using the Client Credentials Certificate Rotation
- PKCE Required for OAuth 2.0 Authorization Code Grant Flow in NetSuite 2027.1
- End of Support for New Integrations Using the Token-based Authentication (TBA) feature in 2027.1
- Multi-Factor Authentication (MFA) Required for FedEx Account Registration
- New Fields for Shipping Hazmat or Dangerous Goods
- New ZPLII FedEx Label Types
- New Attach and Detach Operations in REST Web Services
- Support for Homogeneous Batch Operations in REST Web Services
- New create-form Operation in REST Web Services
- New selectOptions Operation in REST Web Services
- SOAP Web Services Endpoint Availability

2026.1 Release

SuiteTax

› Line Level Location in SuiteTax

- SuiteTax now considers line-level locations—not just the header location—when determining nexus

› Tax on Term Discounts in SuiteTax for Sales Transactions

- SuiteTax now automatically adjusts tax when a customer earns a term discount on a sales transaction

Inventory Management

Supply Chain Planning & Allocation

Enhancements

- NetSuite now includes a Supply Chain Planning Results Workbook for MRP users, giving a unified view of current and future supply and demand. It includes pages for purchasing, sales, production, and overall production summaries, and can be customized.
- The Earliest Item Availability page has also been enhanced to support kit items, calculating availability based on all component quantities. If Supply Allocation is enabled, you can see kit availability by location; if Sales Channel Allocation is also enabled, availability is limited based on sales channel reservations. These improvements help teams provide accurate kit availability and promise dates.

Inventory Management

Supply Chain Planning & Allocation

Supply Planning Issue Fixes

- Purchase Orders Now Use Standard Form for All Order Items
- Supply Type and Supply Lot Sizing Method Fields Now Automatically Populate

Inventory Management: Warehouse Management Enhancements

WMS

- › Receiving with Estimated or Actual Landed Cost
- › Manually Posting Item Receipts During Receiving
- › Reversal of Inbound Shipment Receiving
- › Search Inventory for Kit/Package Items
- › Processing Zero Quantity Picks
- › Picking Updates for Backordered Quantities

2026.1 Release
